- 2005. 11 Announced customer satisfaction management.
- 2005. 07 Began supplying city gas in Seocheon.
- 2005. 06 Acquired CESbusiness rights in Cheonan Cheongsu District.
- 2005. 01 Opened Jungbu Citygas call center.
- 2004. 10 Completed Sindang CNGrefueling station.
- 2003. 06 Completed Seongseong CNGrefueling station.
- 2003. 01 Established JB Enertek.
- 2002. 09 Began supplying city gas in Nonsan and Boryeong.
- 2001. 06 Began supplying city gas for Gongju.
- 2001. Achieved KRW100billion in sales.
- 2000. Expanded areas of service.
6 regions : Boryeong, Nonsan, Geumsan, Buyeo, Seocheon and Cheongyang
- 1999. Reached 100 million m³ in sales revenue.
- 1996. 05 Began supplying city gas in Yeongi.
- 1995. 11 Began supplying city gas in Asan.
- 1995. 05 Expanded service area (Gongju).
- 1993. 11 Began supplying city gas in Cheonan.
- 1992. 09 Acquired a business license for city gas (The 1st in Chungcheongnam-do).
Areas of service: Cheonan, Asan, Yeongi
- 1992. 06 Established Jungbu Citygas.

Management principles

[Green management caring for the environment]

We conduct corporate management that creates a clean and eco-friendly world.

[Clean management maintaining transparency]

We pursue a transparent and sound corporate culture between our customers, employees, and businesses.

[Customer-oriented management providing the best services]

We implement systematic management to provide the best services to ensure customer satisfaction.

[Responsible management fulfilling the company's social responsibility]

We conduct social contribution activities in the local community through a management policy promoting love and sharing.

We with the help of our customers will grow into a global leader of the energy industry!

JB Corporation is confidently striding into the future with new growth engines such as CES, renewable energy, bio-business, and more.

The service of JB Corporation covers:

Cheonan and Asan controlled by the head office;
 Yeongi, Gongju and Sejong controlled by the central branch;
 Boryeong, Seocheon and Cheongyang controlled by the western branch;
 And Nonsan, Geumsan and Buyeo controlled by the southern branch.
 We continually strive for customer convenience and the regional development.

Clean city, clean environment. . .

City gas is a pollution-free source of energy.

What is city gas?

Natural gas (NG) collected from gas fields is condensed into a odorless, colorless liquid known as LNG(Liquefied Natural Gas) by cooling it to -162°C and reducing the bulk by 1/600 for ease of storage and transport. The liquid is then returned to its original state and supplied as natural gas.

Characteristics of city gas

Clean »It is a pollution-free, clean energy source which produces few pollutants when burned.

Safe »It is a safe energy source which disperses readily as it is lighter than air.

Convenient »It is a convenient energy source stably supplied through pipeline systems.

Economical »It is an economical energy source offering high thermal efficiency at a cheap price.

Comparison of pollutants in different fuels (unit: g/10,000kcal)

Making safe energy even safer!
 We are always protecting our customers with our vigilant safety management system!

Remote monitor & control system

Our state-of-the-art safety system remotely monitors safety of the local distribution station and gas pressure regulating stations through wire networks and CDMA wireless networks.

- 1 local distribution station and 128 gas pressure regulating stations (73 sites above ground / 55 sites below ground)
- Items for remote monitoring: gas pressure, leakage, safety slam-shut valve (SSV), opening & closing of the door, cathodic protection, communication, electricity, RTU outer box, interior and exterior CCTV in the local distribution station, quantity of gas supply, and MOV

Boryeong and Seochon : Boryeong Customer Center

Save energy and make a pleasant city...
CES is a new energy supply system.

The CES project

Community Energy Supply System(CES) is a new energy supply system which directly supplies customers with heat and electricity produced in CES facilities.

The CES project in the Cheonan Cheongsu District

| Summary of construction |

- Area of a lot : 8,118㎡
- Total floor area : 4,602㎡
- Construction size : 2- story above and 1- story below ground
- Completion : Oct. 15,2009

| Status of facilities |

- Capacity of power plant facilities : 25.2MW
- Heat Only Boiler(HOB) : 60Gcal/h
- Heat storage tank : 2,380㎡
- Heat pipelines : 4,539m× 2 (500A~50A)
- Electricity distribution lines : 84,000m (100mm~175mm)

| Volume of supply of heat and electricity |

- Heat : 9,139 households (apartments, government offices, and stores)
- Electricity : 10,656 households (apartments, government offices, stores, and homes)

A society with a warm heart filled with love and sharing!
A joyful society filled with the happiness and pleasure of living together!
